

FCC COMPLIANCE STATEMENT

CAUTION: Changes or modifications not expressly approved by Digital Security Controls Ltd. could void your authority to use this equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Re-orient the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/television technician for help.

The user may find the following booklet prepared by the FCC useful: "How to Identify and Resolve Radio/Television Interference Problems". This booklet is available from the U.S. Government Printing Office, Washington D.C. 20402, Stock # 004-000-00345-4.

Digital Security Controls Ltd. 160 Washburn St., Lockport, NY 14094

This device complies with RSS-210 of Industry Canada. Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

Ce dispositif satisfait aux exigences d'Industrie Canada, prescrites dans le document CNR-210. son utilisation est autorisée seulement aux conditions suivantes: (1) il ne doit pas produire de brouillage et (2) l'utilisateur du dispositif doit être prêt à accepter tout brouillage radioélectrique reçu, même si ce brouillage est susceptible de compromettre le fonctionnement du dispositif.

LIMITED WARRANTY

Digital Security Controls Ltd. warrants that for a period of twelve months from the date of purchase, the product shall be free of defect in materials and workmanship under normal use and that in fulfillment of any breach of such warranty, Digital Security Controls Ltd. shall, at its option, repair or replace the defective equipment upon return of the equipment to its repair depot. This warranty applies only to defects in parts and workmanship and not to damage incurred in shipping or handling, or damage due to causes beyond the control of Digital Security Controls Ltd. such as lightning, excessive voltage, mechanical shock, water damage, or damage arising out of abuse, alteration or improper application of the equipment.

The foregoing warranty shall apply only to the original buyer, and is and shall be in lieu of any and all other warranties, whether expressed or implied and of all other obligations or liabilities on the part of Digital Security Controls Ltd. This warranty contains the entire warranty. Digital Security Controls Ltd. neither assumes, nor authorizes any other person purporting to act on its behalf to modify or to change this warranty, nor to assume for it any other warranty or liability concerning this product.

In no event shall Digital Security Controls Ltd. be liable for any direct, indirect or consequential damages, loss of anticipated profits, loss of time or any other losses incurred by the buyer in connection with the purchase, installation or operation or failure of this product.

WARNING: Digital Security Controls Ltd. recommends that the entire system be completely tested on a regular basis. However, despite frequent testing, and due to, but not limited to, criminal tampering or electrical disruption, it is possible for this product to fail to perform as expected.

WLS908

Wireless Panic Pendant

OPERATING INSTRUCTIONS

The WLS908 Wireless Panic Pendant is a device designed to transmit a non-medical emergency signal from any location within the range of the PC5132-900 Wireless Receiver (software version 2.0 or higher). Signals will be transmitted whether the system is armed or not.

The pendant can be attached to a necklace or a belt clip. The unit is even small and lightweight enough to be placed in a shirt pocket or tucked inside a purse. The pendant is also water resistant.

Signals will not be transmitted if the pendant is not within the range of the wireless receiver.

To activate an alarm, press and hold both large outer buttons for two seconds.

Testing the pendant

The pendant should be tested on a weekly basis along with the rest of your alarm system. For full system testing instructions, please consult your PC5010 Instruction manual. To test the pendant:

1. Begin testing when your system is in the ready state and the keypad Ready light is ON.
2. Press and hold the small middle button on the pendant marked "Test" for two seconds. Once the test has completed and the pendant's battery condition is normal, the Ready will turn off for four to five seconds.
3. If the pendant's battery is low, the keypad Trouble light will turn ON and a series of continuous keypad beeps will be heard.

NOTE: If a low battery condition is detected, you must inform your installer immediately to have the unit replaced.

If you have the PC5132 RS Wireless Receiver, software version 2.0, a panic alarm will occur when the test button is pressed. If you have this receiver, you MUST call your monitoring station before pressing the test button to alert them that you are testing the panic pendant.
