Introduction

Features

Allows compatible alarm control panels to be connected to a DVACS communications network.

Module Specifications

- 4 wire (QUAD) hook-up to Keybus
- Normal current draw of 35mA
- Tamper and Trouble reporting codes
- Maximum cable length: 61m (200 ft)

PC5400 connected to a DVACS network

- Automatic programming for DVACS reporting codes.
- Monitoring for DVACS line fault.
- Module self diagnostics.

Compatible Panels

- PC580
- PC1555
- PC5008
- PC5010
- PC5015
- PC5020

Installation

Mounting the Cabinet

When mounting a new cabinet for the PC5400, select a dry location near the F1/F2 subset for DVACS communications.

To mount the PC5400:

- Press the four white circuit board standoffs into the raised mounting holes from the back of the cabinet.
- Hold the cabinet in position and pull the wires into the cabinet.
- Mount the cabinet securely to the wall using the mounting screws provided. Use the appropriate wall anchors when securing the panel to the drywall, plaster, concrete, brick or other similar surfaces.
- 4. With the cabinet mounted press the PC5400 module onto the standoffs.

Wiring

Refer to the Hook-up Diagram included in this manual.

RED, BLK, YEL and GRN Terminals

Connect the RED, BLK, YEL and GRN terminals to the RED, BLK, YEL and GRN terminals on the control panel. Refer to the control panel *Installation Manual* for complete instructions on Keybus wiring.

T1 and T2

Connect T1 and T2 to a normally closed switch that will be used to monitor tampers. If no tamper switch is desired place a wire between T1 and T2.

PC5400 Hookup Diagram

Programming Section Descriptions

If you will be connecting the PC5400 to a PC580, PC1555, PC5008, PC5010, PC5015 or PC5020 control panel, access the PC5400 programming sections at a system keypad by entering [*][8][Installer's Code][803]. Then enter the 2-digit number of the section you want to program.

Section [06], Option [2]: AC Communications

To change from standard DVACS (150 Baud) to AC communications protocol (300 Baud) program this option as ON.

Section [07]: Subsystem Number

Program the DVACS Subsystem number in this section.

Section [08]: Group Number

Program the DVACS Group number in this section.

Section [09]: Panel DVACS Identifier Code

Program the DVACS ID code in this section.

Sections [10-17], [28-30] and [35]: DVACS Reporting Codes

Program the DVACS reporting codes in these sections (see Appendix A: ADT DVACS Transmission Table):

- To have the PC5400 transmit a pre-programmed code from the internal table, leave the programming at the default value FF.
- To prevent the PC5400 from reporting an event, program the code as 00.
- To have the PC5400 transmit a different code, program a value from 01-FE.

Sections [18-27]: Transmission Options

To prevent the PC5400 from transmitting a group of reporting codes (e.g. zone troubles or zone trouble restorals) program the appropriate option as OFF. All options are ON by default.

Sections [31-34]: Zone Definitions

Make sure that the zone definitions match those programmed in the control panel.

Sections [36-99]: Zone Assignments

The programming in these sections tells the PC5400 which partitions each zone is assigned to (on control panels which are capable of partitioning) and/or which zones are in active use.

If the PC5400 is connected to a control panel using partitions, make sure that the zone/partition assignments match those programmed in the control panel.

If the PC5400 is connected to a control panel without partitions, you must still program these sections: for each used zone on the control panel, turn ON the option that assigns the zone to partition 1.

NOTE: If you change any of the above options from the default settings, test the PC5400 to make sure it is operating as desired.

Programming Worksheets

If you will be connecting the PC5400 to a PC580, PC1555, PC5008, PC5010, PC5015 or PC5020 control panel, access the PC5400 programming sections at a system keypad by entering [*][8][Installer's Code][803]. Then enter the 2-digit number of the section you want to program. See page 7 for PC580, PC1555, PC5008, PC5010, PC5015 or PC5020 programming sections.

Program the following sections for all control panels:

LIMITED WARRANTY

Digital Security Controls Ltd. warrants that for a period of twelve months from the date of purchase, the product shall be free of defect in materials and workmanship under normal use and that in fulfilment of any breach of such warranty, Digital Security Controls Ltd. shall, at its option, repair or replace the defective equipment upon return of the equipment to its repair depot. This warranty applies only to defects in parts and workmanship and not to damage incurred in shipping or handling, or damage due to causes beyond the control of Digital Security Controls Ltd. such as lightning, excessive voltage, mechanical shock, water damage, or damage arising out of abuse, alteration or improper application of the equipment.

The foregoing warranty shall apply only to the original buyer, and is and shall be in lieu of any and all other warranties, whether expressed or implied and of all other obligations or liabilities on the part of Digital Security Controls Ltd. This warranty contains the entire warranty. Digital Security Controls Ltd. neither assumes responsibility for, nor authorizes any other person purporting to act on its behalf to modify or to change this warranty, nor to assume for it any other warranty or liability concerning this product.

In no event shall Digital Security Controls Ltd. be liable for any direct, indirect or consequential damages, loss of anticipated profits, loss of time or any other losses incurred by the buyer in connection with the purchase, installation or operation or failure of this product.

WARNING: Digital Security Controls Ltd. recommends that the entire system be completely tested on a regular basis. However, despite frequent testing, and due to, but not limited to, criminal tampering or electrical disruption, it is possible for this product to fail to perform as expected.

FCC COMPLIANCE STATEMENT

<u>CAUTION</u>: Changes or modifications not expressly approved by Digital Security Controls Ltd. could void your authority to use this equipment.

This equipment generates and uses radio frequency energy and if not installed and used properly, in strict accordance with the manufacturer's instructions, may cause interference to radio and television reception. It has been type tested and found to comply with the limits for Class B device in accordance with the specifications in Subpart "B" of Part 15 of FCC Rules, which are designed to provide reasonable protection against such interference in any residential installation. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause interference to television or radio reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- · Re-orient the receiving antenna
- Relocate the alarm control with respect to the receiver
- · Move the alarm control away from the receiver
- Connect the alarm control into a different outlet so that alarm control and receiver are on different circuits.

If necessary, the user should consult the dealer or an experienced radio/television technician for additional suggestions. The user may find the following booklet prepared by the FCC useful: "How to Identify and Resolve Radio/Television Interference Problems". This booklet is available from the U.S. Government Printing Office, Washington D.C. 20402, Stock # 004-000-00345-4.
