Network Camera Firmware Version: V5.5.120
Release Note
# (2021-04-14)

Firmware Basic Information	Firmware Version:	V5.5.120 build210329

4G Solar Camera V5.5.120 Features

1. New Features

● Newly release DS-2XS2T41G0-ID/4G/C04S05 model, with Wakeup Mode as default. In this mode, only PIR triggered capture and remote access wakeup are supported.

● In the Inactive state, press and hold the Reset button for more than 3 seconds until you hear the prompt tone. At this time, the device is activated and Hik-Connect is enabled, you can use the default verification code on the device to add it to the platform.

● When the DIP switch is OFF, the device does not respond to any external triggers except the DIP switch, and the upgrade will fail. It can be stored for more than 40 days with 50% power.

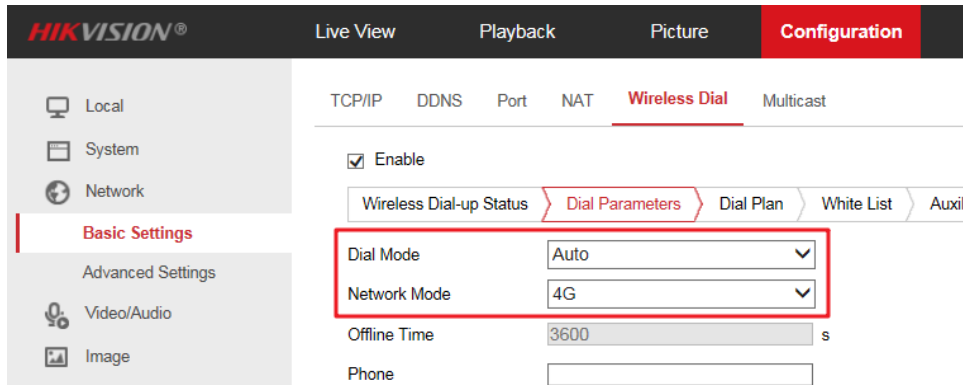

● All the external interfaces of the camera, such as serial port, network cable, SD card, etc., can be used normally after the DIP switch is turned on and the USB power supply is connected.

2. Improved Features

● Optimize the 4G network abnormal recovery mechanism. When the network is poor, the

autonomous network recovery can be performed once every 30 minutes.

- Optimize wireless dialing strategy, with Auto mode as default.

Customer Impact and Recommended Action

This update refers to function/compatibility improvement and will take effect automatically after the Date of Change. We are very sorry for any inconvenience of use-habit changes caused by this action. For any questions and request for this firmware, please contact our local technical support team.

Remarks:

- Hikvision reserves the right to change, alter or withdraw the above notification without prior notice.

- Product design and specifications are subject to change without prior notice.

- The Hikvision firmware may contain errors known as errata which may cause the product to deviate from published specifications. Current characterized errata are available on request.

- Hikvision is not liable for any typing or printing errors.
