

Wi-Fi Doorbell Firmware

Version: V1.4.61 build20170731

Release Notes

(2017-8-24)

New Features

1. Connect Wi-Fi by scan QR code

Wi-Fi doorbell now can connect Wi-Fi by scanning the QR code generated from Hik-connect App with doorbell's build-in camera. The suggested scanning distance is 5 to 10 cm. The doorbell will gives a beep when successful recognizes the QR code.

- 2. Support Wi-Fi protocol 802.11n
- 3. Doorbell with customized mode name can connect to Hik-connect

Customized mode doorbell can connect to Hik-connect without pre-register the mode name to EZVIZ Cloud.

Improved Features

- 1. Fixed the bug that the stored local video can not play back.
- 2. Fixed the bug that doorbell will stop motion detection video record when App's alarm notification disabled.
- 3. Fixed the bug that doorbell doesn't report its time zone information when first time use.

Upgrade Methods

Support 3 methods for upgrade Wi-Fi doorbell:

1. Upgrade in Hik-connect App

Hik-connect will automatically detect new available firmware for Wi-Fi door bell, you can upgrade in: **device setting>> device version:**

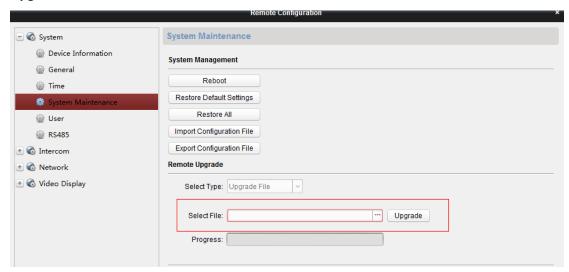

2. Upgrade with SD card

Put the new firmware into SD card, incert card to Wi-Fi door bell, then restart to upgrade the device.

3. Upgrade with 4200
