6. How to upgrade the new firmware

Step1:

Disable the wifi function, connect the device to your PC with USB cable and open the detected disk.

Step2:

Copy the upgrade file (digicap.dav) and paste it to the root directory of the device.

Step3:

Disconnect the device from your PC and reboot the device. Then the device upgrades automatically. The upgrading process will be displayed in the main interface, it will take a minute or so.
