

Title:	How to configure Video Management	Version:	v1.0	Date:	10/10/2018
Product:	AX Series Wireless Security Control Panel			Page:	1 of 5

Preparation

1. AX Series Wireless Security Control Panel, V1.0.0 or above
2. Internet Explorer or 4200 (2.7.3.8)

How to configure Video Management

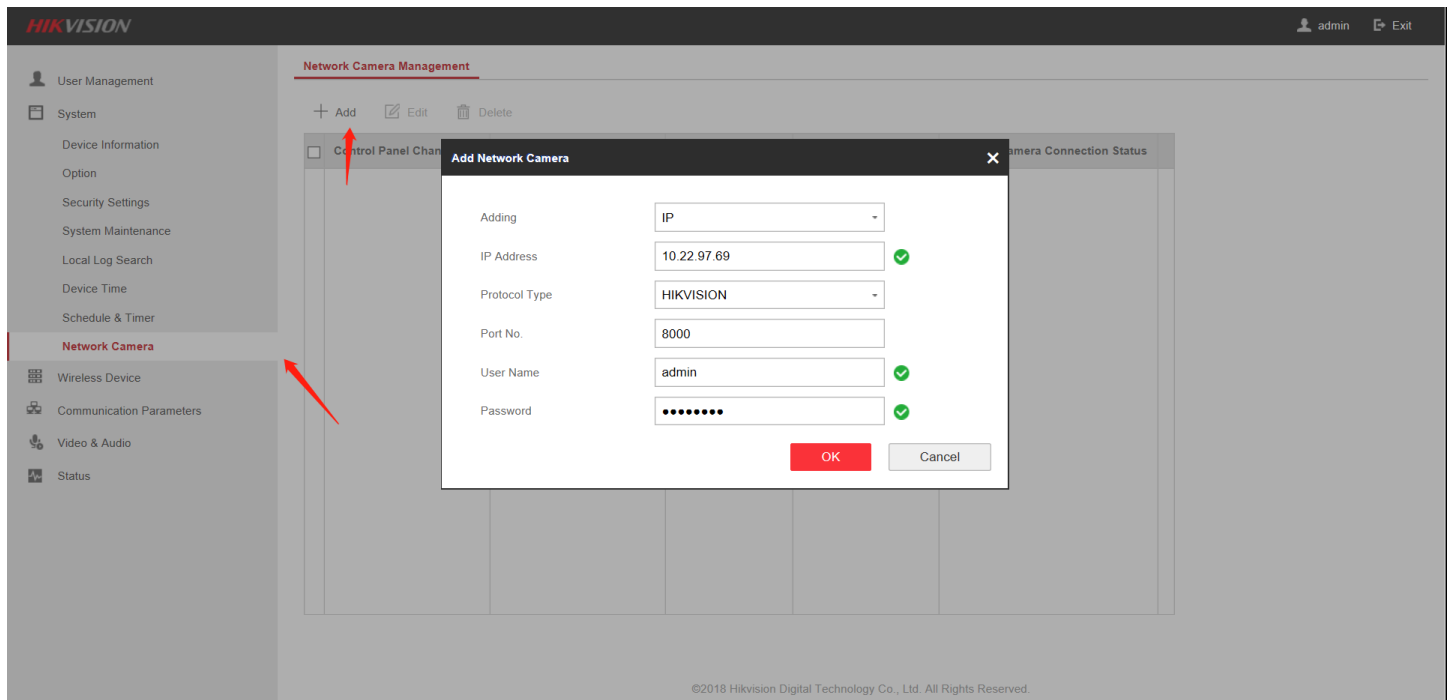

You can add two network cameras to the wireless security control panel, and link the camera with the selected zone for video monitoring. You can also receive and view the event video via client and Email.

1. Add Cameras to the Security Control Panel

- 1) Click System → Network Camera to enter the network camera management page.
- 2) Click Add, and enter the basic information of the camera, such as camera name, IP address, and port No.
- 3) Enter the user name and password of the camera.
- 4) Click Save.

Note

You can add two network cameras for a wireless security control panel.

Email:

The alarm video playback will be sent to the email as an attachment.

If you need this feature, refer to document: **How to configure Event Video Transfer via Email Settings.**

The screenshot shows an email client interface. On the left, a list of messages is displayed, with the most recent one selected. The main pane shows the details of the selected email, including the sender's name and address, the recipient, and a video attachment. The email body contains a message from the host with technical details about the alarm event.
