2.3.1 Added Feature	2
Chapter 3 Resolved Issues	3

Chapter 1 Introduction

1.1 Overview

iVMS-4200 AC Client software is a versatile security management software for video intercom devices and access control devices.

The software provides multiple functionalities including person management, access control, video intercom, time & attendance, etc., for the connected devices to meet the needs of monitoring task. With the flexible distributed structure and easy-to-use operations, the client software is widely applied to the surveillance projects of medium or small scale.

1.2 Components

Component	Version	Date of Release	Latest Version or Not
Network SDK	V6.1.5.10	2020-6-24	No
ISUP SDK	V2.3.1.2	2020-4-10	Yes

Chapter 2 What's New

2.1 Event Center

2.1.1 Added Features

1. On Event Search page, added Event Type and Search by Keyword for filtering certain event types and event details.
2. Supports filtering real-time events by event priority.

2.2 Access Control

2.2.1 Added Features

1. Supports enabling/disabling calling between added video intercom devices and the client. If enabled, you can call the intercom device via client, and the client can answer the calling from the device.
2. Added Access Group Search used for searching access group that a person belongs to and viewing other related information including credential No., credential type, and applying status, etc. Supported searching conditions include device name, person name, and applying status.
3. Supports applying application software package to indoor station.

2.3 Attendance

2.3.1 Added Feature

Supports importing CSV file containing events stored in devices to the client

Chapter 3 Resolved Issues

The following are issues resolved in this version.

No.	Issue Description
1	Fixed the bug that alarm sources (alarm input, alarm output, zone, etc.) are not displayed in door station and indoor station's groups.
2	Fixed the bug that when valid check-out time is not on the same day with valid check-in time, an error of valid check-out time exception prompts after saving the settings on the Break Time page.
3	Fixed the bug that the last but one page of person information is not displayed after deleting persons on the last page.
4	Optimized the character color on the Resource Statistics of Guarding Vision.
5	Fixed the bug of importing person information stored in third-party database to the client. No more than 5,000 persons' information can be imported to the client from third-party database of old versions (V2.8/V2.7).
6	Fixed the exception of card QR code icon on Guarding Vision.
