

## DS-MH2111 V2.1.1 release note

(2017.11.15)

### Product picture:

### Technology highlights:

1. Adding low power warning function: When battery is lower than 3.5V, Body worn camera won't boot when pressing power button and a red indicator will blink.
2. Adding charging reminder function under power off state: A red indicator will light during the charging period and it will stop when fully charged.
3. Adding hardware reset function (SOS + Power button): Press to reset the body worn camera when the system crashed.
4. Adding charging protection: body worn camera will suspend charging when battery temperature is above 50 degree.
5. Adding system watchdog: the watchdog can monitor the running system and restart the device automatically when the system collapsed.
6. Improve the tactile experience and the connector's reliability of the buttons.
