Face Recognition Terminal	DS-K1T341AM	
Fingerprint Card Reader	DS-K1201MF	

How to configure Event Linkage for the 26 series Access Controller

1. Access Controller configuration.

- 1) Connect the controller to the Ethernet, search the device IP address via the SADP software.
- 2) Adding the controller to IVMS-4200, as shown below.

2) You can start configuring the event linkage you need (for example: linkage four doors open), as shown below.

4. Simulate the occurrence of events and check the status of the

event linkage.

1) Simulate the occurrence of an event using wires. The four lights are fully illuminated, indicating that the event linkage configuration is successful.
