

How to set smart tracking function

Purpose

Set smart tracking function and smart events link smart tracking for PTZ dome cameras.

Steps 1:

Set smart tracking function.

1. Go to Configuration > PTZ > Smart tracking.

- 2. Click Reader Smart Tracking to enable smart tracking function.
- 3. Click Duration 5 , to set duration time.

The speed dome stops tracking when the duration time is up. The duration ranges from 0 to 300 seconds. Notice that if the duration time set to 0 s, the speed dome will keep tracking till the target moving out of the view.

- 4. Adjust the zoom+ and zoom- to change the zoom ratio. Then click **Set Zoom Ratio** to set the current zoom ratio as the tracking zoom ratio.
- 5. Click **save** to save settings.

Steps 1:

Set smart events link smart tracking for PTZ dome cameras.

For DF series speed dome, the camera can set smart events trigger smart tracking. The events contents Intrusion detection, Line crossing detection, Region entrance detection and Region exiting detection. For example, here is how to set line crossing detection link smart tracking.

1. Configure the area settings and enable Line crossing detection function.

Local	Audio Exception Detecti	on Face Detection	Intrusion Detection	e Crossing I	Detecti	on I	Region Entrance D	Detection
System	Enable							
O Network	Are Enable \$	Arming Schedule Lin	ikage Method					
Video/Audio	Line	1	•		Unlock(174s)		4s)
