	Access Controllers				
Product:	Alarm Produ	Page:	1 of 3		

Preparation

Туре	Model	Version
Access Controller	DS-K2604	
Access Controller	DS-K2602	
HCP/HCAC	Client platform software	

Introduction:

Fire event trigger linkage multi-controller linkage door opening via HCP/HCAC

How to configure the fire alarm linkage between Access Controllers

1. Set-up with the Web Client

- 1) Connect the Access Controller to the Ethernet, search the device IP address via the SADP software, and then enter the searched IP address in the address bar.
- 2) Activate Device and Login Website

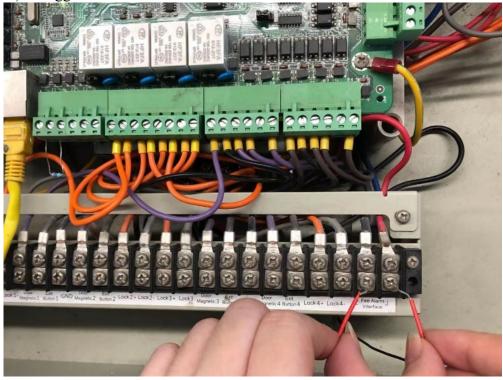

3) Add Devices.
