

## **Handheld Thermal Monocular**

**Version:V5.4.24 build200808**

### **Release Note**

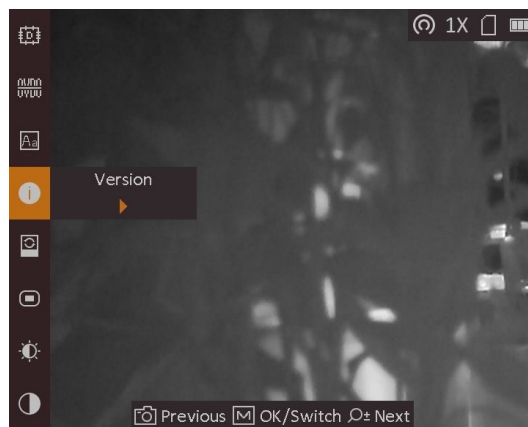

**(2020-9-19)**

### **General Information**

Firmware Version	V5.4.24 build 200808
------------------	----------------------

## V5.4.24 Key Updates

1. Scene Mode changes from Winter Mode and Summer Mode to Jungle Mode and Recognition Mode, TS01 and TS03 series have this two new modes. Jungle Mode is more suitable for hunting because of the highlight function of small objects, while Recognition Mode improves photo layered so that the object edge is more distinct. Hold  button to get into menu, then select  as Jungle Mode or  as Recognition Mode.
2. UI improvement, added the floating name on the UI menu.

3. Added 8X digital zoom for TS03 and TS06 series.
4. Improved the image performance of TS01 and TS03 series.

Original

Post-optimized

5. Support multi-language menu such as English, Russian, German, Czech, French, Spanish, Danish, Norwegian, Swedish, Finnish, and Hungarian.

6. Provide multi-language QSG such as English, Russian, German, Czech, French, Spanish, Danish, Norwegian, Swedish, Finnish, Hungarian, Italian, Norwegian, Polish, Portuguese, Romanian, Slovak, Spanish, Swedish and Russian.
