Summary of testing:

The sample(s) in this report is assessed for risk of burning, according to the requirements of Methods for the assessment of human responses to contact with surfaces (EN ISO: 13732-1: 2008, ISO 13732-1:2006).

When determining the test conclusion, the Measurement Uncertainty of test has been considered.

Model DS-2XM6522G0-I/ND was selected for test as representative.

Stabilized PoE power source was used for test.

Test for assessment of risk of burning.

The max. recommended temperature is 55 °C by manufacturer.

General product information:	
Function:	Network Camera main function is collecting real-time video signals, Power by stabilized PoE then through Signal terminal transmission to PC online surveillance
Power Source:	Stabilized Power over Ethernet
Installation:	Used on rolling stock inside railway vehicles, body mounted
Construction:	Metal enclosure fixed by screws
Model differences:	
All models are identical except model name and software version.
